## Classic Sudoku

Place the digits 1 through 9 into the empty cells in the grid (a single digit per cell) so that each digit appears exactly once in each of the following regions: the nine rows, the nine columns, and the nine outlined 3×3 regions.

			9				5	3
			4	6				9
			7	8	5			
7	6	4				3		
	8	9				5	2	
		1				4	8	6
			6	5	1			
8				7	9			
1	7				4

## Killer Sudoku

Follow Sudoku Rules. In addition, the digits in each region delineated by dotted lines must sum to the value given in that region. Digits can repeat within a caged region, provided they don't violate other sudoku rules.

7	21			14	12	9		13
		12				46		
14			13					
30				23				
						23		
46					29

### 0-9 Sudoku

Follow Sudoku Rules, except that the ten numbers from 0-9 will be used instead of the nine numbers 1-9. Two numbers will go into each of the cells containing slashes (in any order).

		8	9				5	
	7				4			1
6				3		4		
	5				3		4	
		2			0		3	
	1		2					6
		1		2				7
0			1				9	
	9					6	5

CHAMPIONSHIP  
PHILADELPHIA

## Consecutive Sudoku

Follow Sudoku Rules. If a bar is given between two (orthogonally) adjacent cells, then the two numbers put in those cells must be consecutive (differing by one, such as 3 and 4). If a bar is not given, the two digits cannot be consecutive.

## Just One Cell Sudoku - Basic Study

Follow Sudoku Rules. This puzzle has multiple solutions for the entire grid, but there is at least one empty cell that will contain the same digit for all solutions. You are to locate and clearly identify just one digit that can be placed into the grid with absolute certainty.

	3			6	8			5
	6			4		3		
			3			6		
	7		9			4		
					5	9		
	9							3
3			6					
					1			2
	4			9		7

## Diagonal Sudoku

Follow Sudoku Rules. Additionally, the digits 1 to 9 appear exactly once in each of the two main diagonals.

**5**th WORLD  
**SUDOKU**  
CHAMPIONSHIP  
PHILADELPHIA

## Digital Sudoku

Follow Sudoku Rules, except the digits 1 to 6 appear in each row, column, and region. Clues are given in the form of lit segments of an LED. Only digits that contain those lit segments can appear in a given cell.
