

1 Capsules

Points:

Place a digit from 1 to 8 so that each digit appears exactly once in each of the rows, columns and eight outlined rectangles. The digit in each capsule is used for the three columns.

2 Diagonal

Points:

Place a digit from 1 to 9 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the nine outlined 3x3 regions. Additionally, each digit appears exactly once in each of the two main diagonals.

3 Snowflake

Points:

Place a digit from 1 to 6 into each of the hexagons so that each digit appears exactly once in each of the hexagons and in one horizontal and two diagonal directions. **10 points**

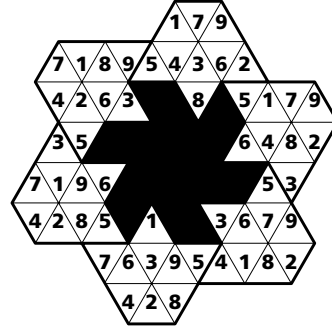

--	--	--

4 Triangles

Points:

Place a digit from 1 to 9 into each of the empty triangles so that each digit appears exactly once in each of the outlined shapes and in one horizontal and two diagonal directions. **10 points**

--	--	--

5 Irregular

Points:

Place a digit from 1 to 6 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the irregularly shaped regions. **10 points**

7 Fourth from Three

Points:

Place a digit from 1 to 6 into each of the empty squares so that each digit appears exactly once in each of the rows, columns and the six outlined 3x2 regions. Solve three sudokus, transfer the digits from the circles into the corresponding cells of the fourth grid and solve the fourth sudoku. **10 points**
